## PRIMARY FEATURES

### Pocket 3D

Topcon's powerful jobsite management tool made for contractors and the way they work. Topcon's Pocket 3D grade management solution brings GNSS down to earth.

Topcon's GNSS technology is changing the way grade checking, staking and excavation gets done. By simply adding our grade management system to their business, contractors take more control over their entire jobsite. Pocket 3D puts the power of GNSS based site management in the hands of site foreman and grade checkers making it easy for them to verify grades, reset stakes or locate utilities on the site.

With Pocket 3D, contractors can measure their productivity on a monthly, weekly or even daily basis to make sure they are staying on schedule. This information provides contractors a tool for maximizing equipment utilization. What a great way to get the most out of your biggest investment.

#### Features:

- Industry's easiest user interface
- Move files from Pocket 3D to 3D-MC
- Stakeout pads, roads/curbs, top and toe of slopes and daylight lines
- Topo surfaces and calculate quantities
- Compatible with all Topcon GNSS and robotic systems

#### Benefits:

- Real time cut/fill info anywhere, not just at stakes
- Reduce survey costs by setting stakes/checking grade in-house
- Bid verification - estimate more accurately
- Rough stake a project for scrapers and dozers - start jobs faster
- Calculate quantities of dirt moved - get paid for work completed

**With Pocket 3D, locate and verify anything on the site. Easily!**
